Profile

Information Technology undergraduate from Vellore Institute of Technology and a published first-author with a strong academic background. Applied expertise in a Wells Fargo internship to improve AI frameworks. An AWS Certified Cloud Practitioner skilled in Python and Java, seeking to build impactful software.

Education

Vellore Institute of Technology, Vellore Sep 2022 – Jul 2026

Bachelors of Technology in Information Technology — CGPA: 9.37

- **Relevant Coursework:** Data Structures, Algorithms, Object Oriented Programming, Database Management Systems, Computer Architecture, Machine Learning, Network & Information Security.

Delhi Public School Bangalore East

Class 12 Percentage: 86% (Science with Biology) 2021 – 2022

Class 10 Percentage: 93% 2019 - 2020

Work Experience

Wells Fargo, Hyderabad May 2025 – July 2025

Technology Intern

- Developed a python methodology for integrating the scoring of H2O MOJO models resulting in a pure-Python service thus simplifying the tech stack.
- Designed and built a proof-of-concept for an AI agent using Pydantic AI and Gemini-1.5-pro to automate the process of the model deployment. The agent could autonomously guide the user through the end to end process of model deployment.
- Collaborated with a team of engineers to debug and resolve issues in the existing framework.

Publication

- **First Author**, "A Lightweight Ensemble Approach for Classification of DDoS Attacks in IoE Environments," accepted for presentation at SENNET 2025 and for publication in the official IEEE conference proceedings..
 - Developed and evaluated four ensemble machine learning models to detect DDoS attacks on IoT devices, identifying a Bagging-Decision Tree model as the optimal solution with **99.96% accuracy** while remaining lightweight and efficient for real-world deployment.

Certification

- **AWS Certified Cloud Practitioner** (2024 - 2027) [[View Certificate](#)]
 - Demonstrated foundational knowledge of core AWS services, including Compute (EC2), Storage (S3), Database (DynamoDB, RDS), and Networking (VPC).
 - Proficient in the AWS Well-Architected Framework, security best practices, and the shared responsibility model.
 - Familiar with AWS pricing models, account management, and cost-optimization principles to build efficient cloud solutions.

Skills

Languages	Proficient in Python, C, Java. Intermediate in C++, JavaScript.
Web Technologies & Databases	React, Node.js, HTML, CSS, jQuery, MySQL, MongoDB.
Tools & Platforms	VS Code, Git, AWS, Postman.
Soft Skills	Teamwork, Effective Leadership, Verbal and Written Communication.

Projects

RoamEase - Travel Planner Application

- Designed a full-stack travel planning platform to streamline trip organization, featuring user/admin dashboards, secure user authentication, dynamic destination loading, and customizable itineraries. Implemented jQuery-validated payments, an AngularJS contact page, and a robust backend with MongoDB and Express.js.

Cloud-Based Personal Finance Management App Using AWS

- Developed a secure and scalable personal finance application using AWS Amplify for the frontend, featuring real-time expense tracking, budget management, and data visualization. Engineered a cost-effective, fully serverless AWS architecture with Lambda, API Gateway, DynamoDB, Cognito, S3, and SNS.

Women Empowerment Mentorship Platform

GDSC Hackathon 2023

- Collaborated in a fast-paced hackathon on the Women Empowerment track, contributing to the development of a web platform. The application was designed to connect aspiring women with esteemed mentors for career guidance, networking, and support.
